POCKET MEMO®

ANALOG

588

WITH MINI CASSETTE

The primary challenge of dictation is to easily identify the importance of individual documents. A Priority Index tone on the 588 makes this possible, allowing your assistant to transcribe in the order of your preference. This is in addition to a variety of features that make the 588 a real asset for any busy professional, such as the Sensitivity Switch that gives the option of either close-range, or conference recording and the Battery Consumption Indicator that clearly shows battery power available.
